Subject: RE: Roosevelt Irrigation District

Dear Ms. Strauss:

Thank you for your prompt response. We very much would appreciate an update on EPA's next steps, process and timing in addressing ADEQ's formal request to EPA to evaluate extending the boundaries of the Motorola 52nd Street federal Superfund Site to include most of the current WVBA WQARF Site. Of course, as we have discussed with EPA and as described and justified in ADEQ's April 24, 2018 request, we strongly believe that extending the boundaries of the Motorola 52nd Street federal Superfund Site to cover the portions of the WVBA WQARF Site as depicted in ADEQ's April 24, 2018 letter is fully consistent with applicable Superfund program policies and procedures. Furthermore, such action by EPA is the most expeditious means to contain and restore contaminated groundwater in the largest contamination site in the State and protect the local low income, minority community from further direct exposure to releases of harmful VOCs.

We also would appreciate feedback on the various procedural options to expedite RID's remedial actions as presented and discussed in our recent meeting and prior correspondence with EPA, assuming EPA were to extend the Motorola 52nd Street Superfund Site boundaries.

As mentioned in our last correspondence, RID is in the process of restarting the existing RID wellhead treatment systems and would like to discuss our current thinking on how best to fully implement the ADEQ-approved and NCP-compliant RID groundwater pump and treat remedial action in the WVBA WQARF Site. As we have explained previously, full remediation can be performed using private funds without any costs to EPA beyond necessary and appropriate oversight.

Let us know potential dates and times your team would be available for a meeting or conference call.

Dear Mr. Kimball,
Thank you for the update. We've been working closely with Arizona DEQ on this matter and would be glad to update you on next steps.

Kind regards,
Alexis Strauss
